BioKGSuite
Content
Coverage how complete
Entity coverage · Relation coverage
Annotation accuracy how accurate
Entity validity · Relational consistency
Trustworthiness how well evidenced
Edge traceability · Source diversity ·
Uncertainty quantification
Structure
Topology how interconnected
Graph cohesion · Clustering coefficient ·
Graph reachability · Community purity
Stability how robust
Random dropout · Periphery dropout
Inference
Task performance how useful
Link prediction · Neighbourhood retrieval ·
Multi-hop reasoning
Generalisation how transferable
Data-sparse · Cross-domain · Prospective
