## a Global stages (independent of any graph)

**1,288** regulator rows
S0

↓ **−1,006** out-of-scope class, no disease target, identifiers pending or unresolved

**282** reviewed new-indication rows, both identifiers resolved
S1

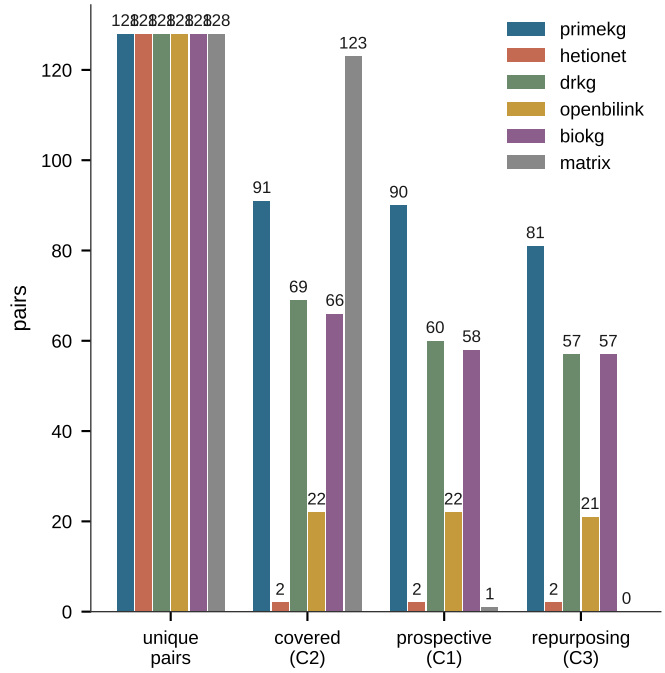
↓ **−26** vaccines 9, combination products 1, no DrugBank id 8, diagnostic agents 2, generic disease targets 6

**256** KG-mappable rows
S2

↓ **−140** 268 (row, disease) events collapse to one pair each; 63 pairs seen by more than one regulator

**128** unique drug-disease pairs
S3

## b Per-graph checks, applied to the S3 pairs



common support over primekg, hetionet, drkg, openbilink, biokg, matrix: evaluable in every graph: 0; strict in every graph: 0

post-cutoff approval set 0.6.0+20260918; counts re-derived by tools/build_post_cutoff_approvals.py
